**Packmore** is the first and only company specialising in the production of 'mobile' wrapping machines for end-of-line packing. Long experience in the sector of stretch film wrapping machines and careful analysis of the market, have led **Packmore** to create new mobile wrapping systems that are absolutely innovative and offering all the versatility which the traditional fixed station systems cannot give. In fact, the machines conceived and patented by **Packmore** are wrapping machines without fixed installation, designed to wrap any pallet in any part of the warehouse in just a few seconds.

MORE THAN PACKAGING

All the wrapping machines are compact, ergonomic and equipped with latest generation stretch film treatment systems to drastically reduce consumption.

Every machine is available with various configurations, related to:

- maximum wrapping height
- size of the working area
- battery autonomy
- kind of stretch film treatment
- kind of stretch of the film
- type of stretch film that is wanted to use

**Girokay**

**Automatic**  
wrapper  
to wrap up  
to **100** pallet  
a day

Automatic wrapping Robot, easy to use, reliable, sturdy and without maintenance. Ideal for simple pallet that don't ask for particular cycles of wrapping. Available with or without power prestretch.
